

Your judgment. Encoded in every decision.

Built in your own accounts, not ours.

CHIP captures the calls only you used to make and puts them where your team can use them. Your standards scale with you, not without you.

8–20 hrs

RECLAIMED / WEEK

A 3-hour rewrite becomes a 30-min check.

Up to 80%

FIRST-PASS ACCURACY

Hits your bar before it reaches you.

\$200K–\$1M

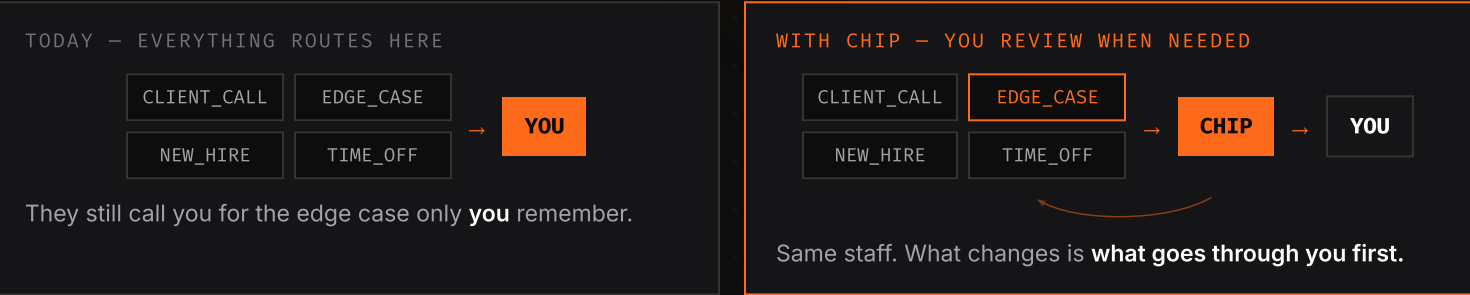

CAPACITY UNLOCKED / YEAR

Without hiring your way out.

Every number varies by tier and team — not a guarantee.

01 // THE PROBLEM

You built something that needs you for everything.

02 // WHY IT'S DIFFERENT

Other tools store notes. We store judgment.

STANDARD AI & WIKIS	CHIP
Captures tasks.	→ Captures decision frameworks.
Rots in six months.	→ Alive and version-controlled.
Generates generic output.	→ Generates answers in your exact voice.

C CONFIGURABLE
Adapts to your workflows.

H HIERARCHICAL
Knows which rule wins.

I INTEGRATED
Your knowledge only.

P PERSONA
Answers in your voice.

03 // THE ENGAGEMENT

Three stages. One outcome: a business that runs without you in the room.

01

Structured Audit

Workflow analysis and a one-page roadmap of three ranked opportunities.

[FIXED SCOPE • NO COMMITMENT]

02

90-Day Pilot

We encode one domain for real, then run it live with your team.

03

Managed Handoff

We roll out across domains and hand you the keys. No lock-in.

[YOUR OWN ACCOUNTS]

A 6-week sprint — about 4 hours of your time. No black box: your accounts hold the storage, index, and interface.

Stop answering the same questions twice.

Start with a capacity audit. No pitch deck. No long sales process — just a conversation to see if it fits.
